# **Petr Stepanov**

Ph.D. graduate in physics with 5+ years of expertise in the user interface (UI) and user experience (UX) design. Strong web application and desktop software development skills.

## **Work Experience**

#### **Full-Stack Developer**

Sticker Store LLC, Portland, OR.

Feb 2023 - Current

- Designed and programmed online e-commerce store (Figma, HTML, CSS, Bootstrap, SASS, Express.JS, EJS, Node.js).
  - Improved the Google PageSpeed Insights metrics (CLS, LCP) up to 97%.
  - Set up low frequency keyword campaign on Google Analytics.
  - Exported local product database to Google Merchant.

#### C++ Software Developer

Thomas Jefferson National Laboratory (JLab), Newport News, VA.

Jul 2020 - Jan 2023

- Coded a Geant4-based simulation for studying the optimal light guide length (range 0-10 cm) for the EM calorimeter used in the Electron-Ion-Collider (EIC) project. Link to GitHub.
- Used Machine Learning (ML) techniques to perform binary classification of thousands of signals from a data acquisition (DAQ) setup. Link to GitHub.
- Applied CERN ROOT framework (C++) to perform statistical analysis of a significant amount (over 100 GB) of the raw experimental data of the Kaon LT experiment at JLab. Link to GitHub.
- Utilized SLURM functionality on the High-Performance Computing (HPC) environment to execute a series of simulations in parallel. This reduced the wall time by more than 10 times.
- Set up data acquisition system that performs triggered waveform acquisition involving 3 devices Tektronix oscilloscope, Network Attached Storage, and RedHat computer (SAMBA, Python, National Instruments NI-VISA library).
- Contributed 100+ shifts at Hall C at the Thomas Jefferson Particle Accelerator facility for the Pion LT project.

#### Software Developer · Postdoctoral Researcher

Catholic University of America (CUA), Washington, DC.

Jul 2020 - Jan 2023

- Programmed a Geant-4 computer simulation (C++, CMake, Eclipse IDE, gdb) to study the performance of a novel scintillation material for EIC, Brookhaven National Lab. Link to GitHub.
- Visualized energy deposition profiles and calculated energy resolutions for a variety of detector assemblies.
- Teaching experience. Mentoring students within a 3-month Research Experiences for Undergraduates (REU) program at the Physics Department at CUA.
- Enhanced debugging of the CERN library source code led to the publishing of more than 10 bug reports on the ROOT (C++) forum.

## Software Developer • Research Assistant

Bowling Green State University (BGSU), Bowling Green, OH.

Aug 2014 - May 2020

- · Assembled positron lifetime and Doppler spectrometers from ORTEC and Canberra (Mirion) fast electronic units. Utilized High-Purity Germanium Detectors (HPGe) and scintillation-based detector systems for single-photon counting.
- Defined and resolved novel kinetic equations of behavior of e+ and Ps atoms in solids, liquids, and nano-powders (Wolfram Mathematica).
- Developed three open-source programs (C++, CERN ROOT) for fitting and interpretation of the experimental spectra for above data acquisition systems (DAO).
- · Combination of the hardware and software skills allowed for:
  - Estimation of defect concentrations and grain sizes in solids.
  - Classification of defect types (vacancies, dislocations).
  - Characterization of the chemical decoration of defects.
- Developed website (Express.js, Gulp, Bootstrap) and visual identity for the SelimLab research group.

- Made iOS application (Swift, Ulkit, storyboards) for the <u>We.Team</u> messenger (more than 3k monthly downloads in AppStore). Participated in cloud-based messenger development with enhanced file sharing capabilities (HTML, React JS, SASS).
- Migrated the landing page for <u>Sweetbridge</u> company from WordPress to Jekyll static site generator (Ruby, CSS). This resulted in a 70% improvement in the page load time.
- Developed the website front-end (Angular.js, HTML, LESS) and iOS mobile application (Ionic) for the <u>Lili Social</u> network.
- · Web design.
  - Designed logos, UI/UX prototypes (Figma, Sketch, Illustrator) and branding identity for over 10 different companies.
  - Converted numerous design assets and mockups into responsive HTML and CSS.
  - Mocked up and integrated dozens of cross-browser responsive email templates.

#### Web Designer, Full Stack Web Developer

Gridnine Systems, Moscow, Russia.

Apr 2011 - Aug 2014

- Prototyped and designed interactive mockups for <u>Otixo</u> cloud file integrator (Balsamiq, Adobe Creative Suite). Utilized Google Web Toolkit (GWT) Model-View-Presenter (MVP) framework to develop application frontend (JavaScript, responsive CSS).
- Responsible for the front-end development of the <u>ATH American Express</u> the largest travel management company in Russia (JavaScript, Backbone.js, and RequireJS). Increased the front-end load time by over 30%.
- Implemented image processing servlets on the backend to generate banners for five different social networks (PHP, ImageMagic).
- Wireframed and sliced to web pages numerous UI/UX mockups for web applications (Balsamiq, Photoshop, HTML and CSS).

#### **Computer Science Teacher**

Phys-Tech College at MIPT, Moscow, Russia.

Oct 2009 - May 2011

 Provided instructions and guidance to high school students on the following computer courses: C/C++ programming, HTML, Adobe Photoshop and 3D Studio Max.

#### **Research Scientist**

<u>Institute for Theoretical and Experimental Physics (ITEP)</u>, Moscow, Russia.

Sep 2008 - Apr 2011

 Application of positron lifetime spectroscopy for studying the radioactive-induced defects in steels. Monte-Carlo particle simulations with Fortran 95. Maintaining software for CAMECA tomographic atom probe (MSVC). Application of CERN ROOT libraries for fitting and analysis of experimental spectra.

## **Education**

## Bowling Green State University (BGSU) • OH, United States

Aug 2014 - May 2020

Ph.D. in Photochemical Sciences • GPA 3.423. <u>Dissertation</u>: Novel developments in positron spectroscopy (PAS).

### British Higher School of Art and Design (BHSAD) • Moscow, Russia

Dec 2011 - Feb 2012

Three-month intensive in Graphical Design and Visual Communications (illustration, lettering, brand identity).

## **Professional Networks**

- Find examples of my code on GitHub (50+ repositories).
- Discover my professional contacts on LinkedIn (200+ connections).
- Check out my UI and UX design portfolio on <u>Dribbble</u> (50+ shots).

## **Relevant Interests**

- Hosting an open-source project for keyboard remapping on Linux 300+ stars on GitHub.
- Developed a <u>RAMDisk plugin</u> for Linux that provides 50% increase in source code indexing time.
- Created two shared libraries for the ROOT data analysis framework [1, 2].
